

# AV200 – EASY EAVE ATTIC REPLACEMENT VENT

2x4 RAFTER • UNDER ATTIC EAVE • SOFFIT

## 3 easy installation steps:

1. Leave old vent frame in place (may remove or retain old screen)
2. Push EZRvent into old vent opening and adjust size
3. Install with two 1-½" galvanized screws

- Easy to Install
- Higher Grade
- Retrofit
- New Construction

**EZRvent - AV200** is an easy to install under eave attic and soffit replacement vent for your old 2x4 rafter and 3-½" x 22" to 23-½" vent openings. AV200 is made of a durable UV protected plastic and heavy gauge metal screen that will last for years.

**Installation is easy** and saves labor time! Simply leave old vent frame in place, push EZRvent in place adjusting its size, and install one 1-½" screw at each end of the vent.

It's as easy as that! Existing stucco and siding remains intact.

Although designed as a replacement / retrofit vent to keep the critters out, the EZRvent AV200 can be used in new construction for a higher grade finished look than standard new construction vents. With their unique frame shadow box styling and recessed screens, EZRvents are a perfect complement to vinyl clad windows and doors.

**FITS 2x4 RAFTER SPACING  
SIZES 22" TO 23.5"**

(FITS ROUGH OPENING SIZE:  
3.5" x 22" TO 23.5")
